## Storage Suction System

With the unique core technology of suction cups and creativity, FECA stylish suction hooks/ storage holders are tool-free, durable, 100% waterproof and reusable that assist your daily organization to become easy and convenient. There is no damage to the wall and its reusable feature are environment-friendly.

FECA is not just the great houseware, but also the way to show your smart taste because it creates the new lifestyle with the combination of functions and elegance. Its simple but beautiful design also becomes an essential fashion trend in the world. There are many FECA products winning the Taiwan Excellence Award. FECA create the smart storage life with you wherever whenever.

## Environmental SVHC Control

A rubber product is a highly elastic object formed by a multi-component combination of substances through a certain cross-linking reaction. It is generally composed of raw rubber, fillers, plasticizers, active agents, accelerators, vulcanizing agents, and other additives (pigments, odors, electrical conductivity, etc.).

There are many types of rubber, and natural rubber (raw gum) itself is non-toxic. The toxicity of some industrial rubber products comes from chemical additives and has nothing to do with rubber. However, due to the use of many chemical additives in the rubber processing process, various toxic substances/gases/pollutants may be generated during the processing. Rubber products used for contacting/packaging/processing food are processed in strict accordance with SVHC by ECHA, and the final product can be considered non-toxic.

Therefore, the careful selection of additives is a profound problem CHIEN CHIE not only represents ISO certification, but also strict with suppliers supplying RoHS & REACH certificates for take care of earth.

## Formulation Technology And Design

Design rubber tooling is a key of essential. The vulcanization processing of rubber productions will affect productions shape and physical characteristics. In addition, the rubber release agent used to improve the release of the molded product is also an important choice. CHIEN CHIE rubber has an excellent team to solve all problems for you, product size difference, performance improvement, etc. We can provide you with suitable solutions to assist you!

E-mail:[tccr@chien-chie.com.tw](mailto:tccr@chien-chie.com.tw)

**ELEPHANT MOUNTAIN** Professional Transmission Belt

## Timing Belt

Timing belt drive can replace V-belt drive and chain drive. Over time, timing belts have evolved from trapezoidal to round teeth.

### Torque Efficiency:

The meshing of the belt and pulley grooves keeps the timing belt free from heat loss. The thin cross - section of timing belts allows them to require very little energy to bend and attach to the pulleys.

### Speed loss:

The perfect meshing of the timing belt teeth and the pulley grooves keeps the belt from slipping.

When the timing belt is installed correctly, the belt does not need to be tensioned again due to the small elongation of the belt.

## Multi rib V-belt

The V-type drive belt is made of special rubber mixed with other materials, so it provides quite high stability, and has the characteristics of anti-electricity, anti-oil and high-temperature resistance. Widely used in many fields, especially in automation control systems. Models PH&PJ are usually used in sports equipment and industrial machines, and models PK are used in the automotive industry.

## Agriculture Belt

Agricultural belts are designed to perform high power transmission under extreme working conditions and have good stability to adapt to harsh working environments.

- Specially formulated rubber compound
- Excellent resistance to bending stress
- Excellent antistatic, oil resistance, heat resistance, waterproof and other properties
- Good stability, not easy to slip and jump during transmission

## Transmission V-Belt

V-belts are the most widely used and most types of all drive belt types, especially in Industrial drive and vehicle applications. The cross-section of the V-belt is trapezoidal, which can be tightly wedged into the sheave to increase the frictional force, transmit it by frictional force, and allow a large torque to be transmitted before the slip occurs. The friction force can be increased by using the V-belt, and the friction force required for transmission does not need to be maintained by a large tension like a flat belt, so the load of the sheave bearing can be reduced. In addition, the alignment is better. Does not require.

The transmission capacity (friction force) of the V-belt is determined by the angle and thickness of the two inclined surfaces. When the angle is smaller, the positive force on the friction surface is larger; In these two cases, the friction force is larger, that is, the transmission capacity is larger. However, when the angle is small, the difference between the width of the upper surface and the lower surface is small, and the cross-section is approximately square, so the belt is prone to overturning and curling during running; and when the thickness is larger, the bendability is smaller and cannot be used for pulleys with small diameters, in general, the angle is about 40 degrees, and the ratio of the width to the thickness of the upper surface is about 1.6.

## OEM&ODM Rubber Products

## Professional Metal Parts Manufacturer

Lathe processing / CNC lathe processing is an essential processing method for industrial components in recent years, and the quality of workpieces processed by lathes has become increasingly critical.

Ele Shine Metal Industrial Co., Ltd, is profoundly aware of this, using Japanese high-precision CNC lathes, inspection instruments to maintain the quality of workpieces, which is a star in the industry, and has been cooperating with many leading companies worldwide.

All kinds of materials can be processed, for instance, iron metal, copper metal, aluminum alloy, stainless steel etc. We consistently adhere to a creed "Make friends with quality".

**Ele Shine Metal Industry Co., Ltd.** was established in 1980 in Taiwan, is a professional computer CNC automatic lathe milling precision metal parts manufacturer. The main products used in computer components , bicycle parts , optoelectronic components , machine auto parts , gas parts, electronic parts, communication parts, bathroom hardware, machinery, hardware, pneumatic tools , sports equipment, buried screws and nuts , all kinds of connectors the high-precision parts manufacturing and processing . From high-speed lathes, automatic lathes, lathe tool path , and even take heart . CNC lathe and milling at once. Different products require visualization , and provide reliable solutions ! Machining brass , beryllium copper, phosphor bronze ,copper,stainless steel, free cutting steel, alloy steel , steel, aluminum , plastic and other materials , but also with the product as anodizing, polishing , vibration , magnetic resonance imaging , plating, Black , passivation , heat treatment, chromate , phosphate , coating and other surface treatment , processing capacity from OD 2 ~ 42 mm, length 600 mm of precision metal parts can be .

# ISO 9001:2015

## International quality certification factory

Ele Shine Metal Industries CNC lathe deep plowing business for over twenty years, take heart automatic lathe, automatic lathe tool path, CNC automatic lathe milling complex visual products of different products require order items throughout the steam locomotive, bicycles, computers , electronic, optical, mechanical and electrical, precision mechanical, plumbing, appliances, machinery, hardware, pneumatic tools, sports equipment... and other industries.Ele Shine Metal Industry's products have passed the ISO 9001:2015 international quality certification, and the introduction of ESPRIT CAM software applications specialized lathe design, integrate and simplify the process of production materials and processing, in order to ensure and enhance quality control system, Yixiang Metal Industry continue to buy high reliability testing instruments: such as projectors, high-resolution projectors, electronic height gauge, surface roughness tester and all kinds of microscopes and precision dental regulations and so on. Under the strict control from the material, tool applications, milling process, to the finished product, complete control, our professional quality control staff to focus on customer quality control of various precision parts to ensure the highest accuracy and quality

Our OEM Products covered by numerous industries, including bicycle parts, motorcycle parts, electronic parts, sanitary hardware parts, machinery parts, special screw cap, pneumatic parts. Processing of materials can be used with a wide range of customer needs: Contains copper, stainless steel, iron, plastic and aluminum. The O.D. range available is from Ø 2 mm to Ø 42mm and a maximum length of 600 mm

**HANDILY INDUSTRIAL CO., LTD.** was established in 2003. It is a manufacturer specializing in the manufacture of special auto repair tools. The products are suitable for the world's major brands of automobiles and are indispensable hand tools for automobile maintenance.

For example:

- Puller for Ribbed Drive Pully
- Syringe Pump Removal Installation Tool
- Engine Timing Kit
- Engine Timing Tools
- Camshaft Adjister
- Cummins Timing Tools
- Fuel Injector Seal Remover Fitting Install Tool
- Fuel Injector Removal / Installation Tool Kit
- It has a place in the global supply of hand tools

**Puller For Ribbed Drive Pulleys**

Clamps onto any ribbed pulley. Suitable for use on crankshafts, alternators, air conditioning units and water pumps.

**Install/Remove Gear Belt Tool**

Specifically designed for vehicles fitted with the chain driven 1.6/2.0 direct injection petrol engines. These engines are found in the late A, B, CLA, C and E class vehicles. Due to the type of construction used on these engines the cam-shaft needs to be clamped in place to allow dismantling and assemble of the cylinder head. Designed to allow removal and assembly of the camshafts

**Timing Tool Set**

**Timing Tool Set**

The listing of a hand tool must go through multiple processing processes. The precision coordination degree in various processing processes is an important key to the achievement of the quality of hand tools. SUMMIT Enterprise is a related enterprise of HANDILY INDUSTRIAL. In addition to developing its own brand hand tools, it also focuses on the research and development of various processing procedures, so that the hand tools produced by HANDILY and SUMMIT have a place in the world.

"A miss is as good as a mile" SUMMIT is committed to investing in processing equipment. Only with more precision processing machines and the overall processing process can we reach the standard in the assembly of various connecting parts of hand tools and achieve an extraordinary hand tool.

For 30+ years, JEOUTAY LIU Industrial Co., Ltd. in Taichung, Taiwan has produced quality tools with competitive pricing. Our extensive product line includes Blades, Bits, Socket Bits, Anti-slip Bits, Auto parts, and Toolsets. All JEOUTAY products are manufactured in-house using over 36 professional-grade lathe, milling, forced, & stamping machines. Each product goes through rigorous quality inspection, ensuring surface finishes, heat treatment, torque, hardness, & dimensions meet industry standards. We work with clients through the stages of design, development, & manufacturing to meet OEM/ODM requirements.

With years of manufacturing experience & ISO 9001 approval, we ensure quality products & timely delivery.

E-mail:[paul@jeoutay.com](mailto:paul@jeoutay.com)

JEOUTAY LIU Industrial Co., Ltd. have a number of patents for screwdriver products. For the development of new products, we always keep ahead of the industry.

## PLASTIC CASE

Ersson, founded in 1989, is one of the leading manufacturers of plastic case and inlay foam in Taiwan.

For over 35 years Ersson has never lost its core value to provide our clients a variety of tool cases and inlay foams with the best solution, quality and services. All products confirm to international standard.

Ersson is looking forward to establishing a long term and mutual beneficial partnership with you in the near future.

**GT Series**

**AMG Series**  
in 11 sizes

## PEVA & XPE Inlay Foam

After many years inlay foam tray development, Ersson has introduced many kinds of surfaces and colors to customers. Patented 3D carbon, metallic skin and shield skin are always popular in the market. To improve material application, PEVA is applied to tool foam tray. For better durability, it is compound of PE and EVA, which gain the benefits of toughness and softness from both materials characteristics.

## Product Overview

ANTEAM Orgsystem mainly consists of injection boxes in three different sizes and drawer chest. It consists of 50 and 100mm deep drawers and an upper case. Drawers can be stacked up as a drawer chest or mobile tool trolley. ANTEAM Orgsystem is specially designed for hand tools, power tools or even for the fastener application. It can be used in concert with trolley platform for easy movement. Durable, high quality ABS material provides a long service-life while shared same bottom platform provides easy stacking, storage, and transport to users. Create your own combinations to suit your work.

ANTEAM 078  
OD:456X372X115mm

## ■ Air Rivet Nut Tool

composite body

**CCP-20M/U**

Over 3200lbs traction power

Light weight spin-pull rivet nut setter

Quick change connector for tie rod

Set up to 5/16"(M8) stainless steel rivet nuts

Wear-resistant surface extend tool life

Rubber grip with soft touch for easy operation

Stroke 2~7mm

## ■ Air Riveter Tool

**CCP-450R/CCP-450HLR**

With suction control switch

Long stroke(26/30mm)

Set 5/16"(7.8mm)and 3/16"(4.8mm) Monobolt rivets, "T"rivets and standard rivets-in all materials

Soft-set shockless tools

Mandrel collection bottle design allows for easy disposal of spent mandrels

Heavy duty construction for rugged application

Durable, lightweight

Nail back twice as fast, the low pressure operatin

**CHIAO CHANG PNEUMATIC TOOL CORP** is a tool manufacturing company,

specializing in the manufacture of high quality (ISO-9001) tools for distribution in the world-wide market.

We design and manufacture air tools professionally. Our major products include heavy-duty hydraulic riveter tools, heavy-duty hydraulic air rivnut tools, air engraving pens, air nibblers, etc.

We have been producing air tools in Taiwan since 1983, and the whole factory passed ISO 9000 authentication.

We keep on researching, developing and improving the products constantly. Validated by the CE authentication, our products are made with high quality to satisfy our customers.

# RATCHET WIRING DUCT CUTTER

## RATCHET WIRING DUCT CUTTER HJ-15

Ideal for cutting wiring duct up to 120 mm.Angle adjustment design.

Smooth cut surface and accurate angle.

Quickly replace the blade.Easily replaceable Anvil.

Ratchet drive is more labor-saving.Tooth shape meshing longitudinal feed, automatically lock when cutting safe and non-rebound.

ITEM NO.	HJ-15
DIMENSIONS	L320 x W110 x H85 MM
COLOR	Blue,Red,Yellow,Green,Orange
MATERIALS	Body plate : Steel(Steel Plate Cold Commercial),Chrome plating Blade : Carbon tool steel SK5,Chrome plating,Heat treating Anvil : Aluminum alloy Ratchet : Carbon tool steel SK5,Black oxide Handle : TPR,PP
APPLICATION	Cable duct,PVC wiring duct,etc.
CUTTING RANGE	Width maximum 120MM,Angle adjustable 45°-135°
